## 1. INTRODUCTION AND PROJECT DESCRIPTION

Plug Power Inc. (Plug Power or Plug) is proposing to construct a new fuel cell manufacturing line at 1025 John Street in West Henrietta, Monroe County, New York formally referred to as the Innovation Center (also referred to as facility in this document). The location of the property within greater Rochester is provided in Appendix A and Figure 1-1 presents an aerial map of the Innovation Center location. The building in which the new operations will be housed (indicated with a push pin label in Figure 1-1) contains no existing manufacturing operations.

**Figure 1-1. Aerial View of the Proposed Plug Power Innovation Center Location**

In January 2022, Plug Power submitted an air permit application to apply for a new Air State Facility Permit for the Innovation Center pursuant to the requirements in Title 6 of the Codes, Rules and Regulations of New York (6 CRR-NY) Section 201-5. In April, 2022, Plug Power submitted an Air Dispersion Modeling Report which demonstrated Plug Power's operations are in compliance with the requirements of 6 CRR-NY Part 212.

On May 24 2022, the New York State Department of Environmental Conservation (NYSDEC) submitted an email to Trinity Consultants, Inc. (Trinity) indicating that the Air State Facility Permit application for the Innovation Center will be required to follow Environmental Justice procedures. In particular, the facility will be required to provide a Public Participation Plan (PPP) for the facility to the NYSDEC and to carry out actions to engage the public in the local Preliminary Environmental Justice Areas (PEJA's) in accordance with Commissioner's Policy CP-29, Environmental Justice Policies and Regulations. A map of the PEJA in the vicinity of the Innovation Center is provided in Appendix B.

This Public Participation Plan has been prepared to provide the details of Plug Power's plan to meet the requirements of CP-29 and NYSDEC guidance with respect to preparation of a PPP. Upon execution of the PPP, Plug Power will submit a Public Participation Plan Report that details the extent and results of the public outreach.

## 1.1 Plug Power's Mission

Plug Power's mission is to build the clean hydrogen economy – green hydrogen sustainability solutions that lower carbon footprints, increase productivity, and lower operating costs. Green hydrogen is hydrogen generated by renewable power sources or via an electrolyzer through the process of electrolysis - splitting water into hydrogen and oxygen. It is the cleanest form of hydrogen production. Plug uses technology called PEM water electrolysis that can be paired with renewable and intermittent sources such as solar, wind, and hydro-electric power to produce green hydrogen at a low cost to customers.

Plug is building an end-to-end green hydrogen ecosystem, from production, storage and delivery to energy generation, to help its customers meet their business goals and decarbonize the economy. In creating the first commercially viable market for hydrogen fuel cell technology, the company has deployed more than 50,000 fuel cell systems and over 165 fueling stations, more than anyone else in the world, and is the largest buyer of liquid hydrogen. With plans to build and operate a green hydrogen highway across North America and Europe, Plug is building a state-of-the-art Innovation Center to produce electrolyzers and fuel cells and multiple green hydrogen production plants that will yield 500 tons of liquid green hydrogen daily by 2025.

## 1.2 The Innovation Center

Plug has invested over \$125 million into the Innovation Center at the 1025 John Street location in West Henrietta, NY where it will design, test, and manufacture the core technology that goes into fuel cells and electrolyzers. In 2023, the West Henrietta location will be fully operational and will produce Membrane Electrode Assemblies that will be used for Fuel Cell and Electrolyzer stack technology and be implemented in applications around the world. At full capacity, the location will make up to 65,000 stacks.

At this facility, Plug Power's services include:

- ▶ Design, Develop, and Manufacture green products
- ▶ Electrolyzers for Hydrogen production
- ▶ Hydrogen liquefaction/transportation/storage/dispensing equipment
- ▶ Hydrogen applications

Plug Power is proud to lead the green hydrogen movement from its home state of New York, where they have built world-class products with a first-rate team of local talent. Although Plug has expanded into markets around the world, New York remains an integral part of the company. When expanding in New York, no location could match West Henrietta in terms of talent, local supplier networks, and opportunities to partner with top-tier research. In addition, the Innovation Center will utilize green electricity to produce green hydrogen under a New York Power Authority (NYPA) program that utilizes Niagara Falls hydro power. Plug is a strong supporter of bringing high-tech, high-paying clean energy jobs to Rochester and continues to give back to the local community.

## 2. STAKEHOLDER IDENTIFICATION

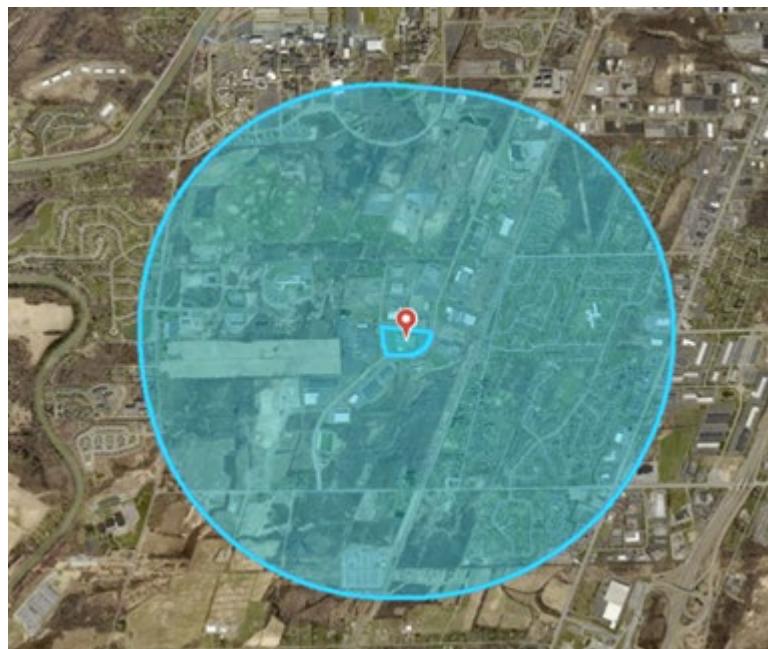

Public participation in the NYSDEC environmental permit review process includes a program of activities that provides opportunities for stakeholders to be informed about and involved in the review of a proposed action. Stakeholders include the following groups that are located near or adjacent to the proposed project, or are responsible to people within this area (i.e., community leaders, politicians):

- ▶ Primary Stakeholders:
  - Residents and neighborhood groups,
  - Community boards and leaders,
  - Local community, civic and recreational organizations,
  - Individuals who have expressed an interest in the proposed project,
  - Religious establishments, and
  - Elected officials who live in and/or represent the area at the town, city.
- ▶ Secondary Stakeholders:
  - Elected officials at local, state level and federal level where appropriate,
  - Municipal clerks and public works department staff, and
  - Local media.

### 2.1 Stakeholder Selection Process

Plug Power has elected to establish a Potential Stakeholder Area based on a radius of one (1) mile from the Innovation Center. Please refer to Figure 2-1. Trinity has evaluated the area shown in this figure to identify potential stakeholders in the categories listed above.

**Figure 2-1. Aerial View of the Potential Stakeholder Area**

### **2.1.1 Residential Properties**

Using data from MonroeCounty.gov, the street address for each tax parcel within the one-mile radius illustrated in Figure 2-1 was identified. Based on demographics, this data primarily results in residential addresses, but may include non-residences such as places of worship, town and other publicly owned buildings, etc. The output of the data pull is presented in Appendix C. Appendix C provides a description of how the information was pulled from Monroe County's website.

### **2.1.2 Non-Residential Properties**

Although the analysis of tax parcels within the one-mile radius as described in the prior section may include non-residential properties (i.e., places of worship, publicly owned properties), a manual internet-based search was completed for religious establishments, elected officials responsible for the area within the Potential Stakeholder Area, and other groups identified in the bullets in the beginning of Section 2. The process that was used to complete the search is provided in Appendix D. Additionally, the resulting non-residential stakeholder list is provided in Appendix D. It is subdivided into primary and secondary categories illustrated in the beginning of Section 2. It is possible that a non-residential stakeholder identified through this process may also be on the list described in Section 2.1.1 and Appendix C. If that is the case, the two lists and public outreach would be conservative, and result in the potential to send more than one notice to the same location.

## **3. PUBLIC OUTREACH AND INFORMATION**

---

Plug Power has provided information to the public in several ways prior to the development of this PPP and will conduct specific public outreach to those stakeholders identified in the Potential Stakeholder Area as described below.

### **3.1 Information Published as of June 2022**

#### **3.1.1 Local News Coverage**

The Innovation Center is a unique facility in a growing field and has the attention of local media outlets and governmental agencies alike. It has been covered extensively with local news coverage, a summary of which is presented in Appendix E. The search conducted for this PPP focuses on local news media that may be relevant to and delivered to the Potential Stakeholder Area illustrated in Figure 2-1. This includes news outlets in Rochester, West Henrietta and at the New York State level. National and global news coverage was not evaluated in detail as those news outlets are not likely to be focused on the Innovation Center within West Henrietta.

#### **3.1.2 Other Published Information**

In addition to the local news coverage related to the Innovation Center, additional searches were conducted to evaluate if there is information trending on social media platforms (i.e., Facebook, Twitter) or other unofficial sources of information related to the Innovation Center. The results of these searches are presented in Appendix E.

### **3.2 Focused Public Participation Process**

#### **3.2.1 Fact Sheet**

Plug Power has developed an initial working draft copy of the Fact Sheet that will be distributed to the stakeholders identified in Appendices C and D. This initial working draft copy is included in Appendix F and includes information regarding the Innovation Center, the environmental permitting requirements, and potential impact from the facility. The fact sheet is in near final form with placeholders for key information such as the public comment period and dates of the planned public meetings. Those details will be finalized after the NYSDEC approves this PPP and Plug Power executes this public outreach.

#### **3.2.2 Public Meetings**

Plug Power is planning to host two public meetings to provide the public with the opportunity to learn more information about the Innovation Center, ask questions about the project and facility and engage with Plug Power on this topic. The public meetings will be held in publicly available venues that are familiar to individuals within the Potential Stakeholder Area and are located within the Potential Stakeholder Area and near the Innovation Center. The two meetings will be held on consecutive days at different times of the day (i.e., 7:00 PM and 1:00 PM) to allow for individuals that work a varied work schedule to attend one of the meetings.

The public meetings are planned to be held at the RIT Inn and Conference Center, 5257 West Henrietta Rd., Henrietta, NY 14467. The dates for the meeting have not yet been established. Plug Power will

establish dates for the meeting and update the fact sheet and other documentation to include the dates and time. The meetings will be scheduled on days that are at least three weeks after the potential stakeholders receive the fact sheet included in Appendix F.

The meetings will be publicized through the following mechanisms:

- ▶ Individual mailers which include a copy of the Fact Sheet will be sent to all stakeholders identified in Appendices C and D.
- ▶ The location, date and time of the meetings will be included on the Fact Sheet.

In addition to providing notice of the public meetings to members of the public, Plug Power will also provide notification to the following individuals and organizations within the NYSDEC. To accomplish this, Plug Power will coordinate directly with the NYSDEC Division of Environmental Permits.

- ▶ Permit Administrator for NYSDEC Region 8
- ▶ Office of Environmental Justice

During the meeting Plug Power and its consulting support staff will provide a presentation of information about Plug, the Innovation Center, environmental permitting requirements, potential environmental risks and mitigation measures implemented by Plug to reduce such risks to attendees. Plug Power / consultants will invite questions and address any questions directly during the meeting or in a follow-up communication if required. The presentation will include at least the following elements:

- ▶ Meeting Agenda,
- ▶ Invitation to pose questions during the meeting and discussion of the process to do so during the meeting and during the public comment period,
- ▶ Introduction to Plug Power,
- ▶ Introduction to the Innovation Center,
- ▶ Environmental Permitting Requirements for the facility,
- ▶ Measures taken to mitigate environmental impact from the facility, and
- ▶ Formal question and answer period.

An initial working draft copy of the presentation that will be given during the public meeting is included in Appendix G. The presentation may be updated to include additional information prior to the public meetings, however the content regarding environmental permitting and how the public can submit comments will not be removed during final editing. In addition, the final version will update key information such as the public comment period and dates of the planned public meetings. Those details will be finalized after the NYSDEC approves this PPP and Plug Power and its consultants execute the proposed public outreach. A copy of the presentation will be made available to attendees that request during the meeting. Questions and dialogue will be encouraged throughout the meeting and there will be a formal question and answer period at the end of the presentation.

Attendees of the meeting will be asked to sign a sign-in log and notes from the meeting will be maintained. A list of attendees and a summary of the meeting notes will be provided to the NYSDEC as part of the PPP report.

### **3.2.3 Data Repositories**

Plug Power will maintain two data repositories, one a physical repository, and one an online repository. Both of the repositories will contain copies of the following documents:

- ▶ Plug Power Innovation Center Fact Sheet.
- ▶ NEW YORK AIR STATE FACILITY PERMIT APPLICATION for Plug Power Inc. Plug Power Innovation Center, NY submitted to the NYSDEC in January 2022. (Public Redacted Version)
- ▶ AIR DISPERSION MODELING REPORT for Plug Power Inc, Plug Power Innovation Center, NY submitted to the NYSEC in April 2022. (Public Redacted Version)
- ▶ Acknowledgement of the Conditional No Exposure Certification for exclusion from permitting under the SPDES Multi-Sector General Permit for Stormwater Discharges Associated with Industrial Activity (GP-0-17-004) from NSYDEC.
- ▶ Confirmation that Monroe County Department of Environmental Services does not require an industrial pretreatment permit for discharging wastewaters to the sewer system.
- ▶ A list of press releases that appear in Appendix E to this PPP.
- ▶ A copy of the NYSDEC-approved Public Participation Plan for the Innovation Center.

The physical repository will be located at the Henrietta Public Library located at 725 Calkins Rd., Rochester, NY 14623. The location is less than three (3) miles from the Innovation Center and is open Mondays through Thursdays from 9:00 AM to 9:00 PM, Fridays from 9:00 AM to 5:00 PM, Saturdays from 10:00 AM to 5:00 PM and closed on Sundays. This schedule provides ample time for access to these documents. The information will be prepared in a binder or folder with a table of contents for easy reference.

The online repository will be located at [www.plugpower.com/enviro-permits](http://www.plugpower.com/enviro-permits) and will have copies of the documents listed above in Adobe Acrobat Portable Document Format (PDF) available for download. The website will be available 24 hours per day and seven days per week (notwithstanding electrical or internet outages).

Should any documents change while this public outreach is ongoing, Plug Power will update the documentation in the physical and online repositories.

### **3.3 Publication Language Analysis**

The NYSDEC has provided guidance that if more than one-third of the population in a census tract speaks a non-English language in the Potential Stakeholder Area, the information prepared for public outreach must be translated to that language(s).

As provided in Appendix H to this PPP, the percent of non-English speaking persons within each census tract identified in the Potential Stakeholder Area for the project is less than 30 percent. Therefore, it is determined that the public outreach in English is adequate for the project.

## **4. PUBLIC PARTICIPATION PLAN REPORT**

---

The Innovation Center Public Participation Plan is presented in Sections 1 – 3 of this document. Following execution of the plan, Plug Power will submit a report to the NYSDEC that documents the execution of the plan.

The Public Participation Plan Report will include the following information:

- ▶ Validation of, or updates to the stakeholder lists in Appendices C and D.
- ▶ Information related to the public meetings held.
  - Sign in sheets.
  - Final presentation delivered.
  - Summary of questions and answers during the session.
- ▶ Substantive concerns received by Plug Power and/or its consultants during the public comment process and public meeting.
- ▶ Final copy of the Fact Sheet.
- ▶ Description of the method(s) used to engage the public and solicit outreach.
- ▶ Written certification of execution of the PPP described in Sections 1 – 3.

## C.2 Determination of Residential Stakeholders

The list of all potential residential addresses within a one (1) mile radius of the facility was generated from the Monroe County Interactive Parcel Map<sup>1</sup>. The interactive website allows a user to generate a list of all tax parcel addresses within a given buffer radius of any point selected within Monroe County, NY. A query can be run by searching for an address, selecting the parcel of land associated with the address on the map, then clicking "Mailing List" on the pop-up that appears in the top left corner. The system prompts the user to input a length in feet to use as the radius of the query, then returns a list of addresses, which can be exported. However, the search returns a maximum of 1000 results from a query. Based on preliminary searches, it was found that more than 1000 tax parcels lie within a one-mile radius of 1025 John St, West Henrietta, NY.

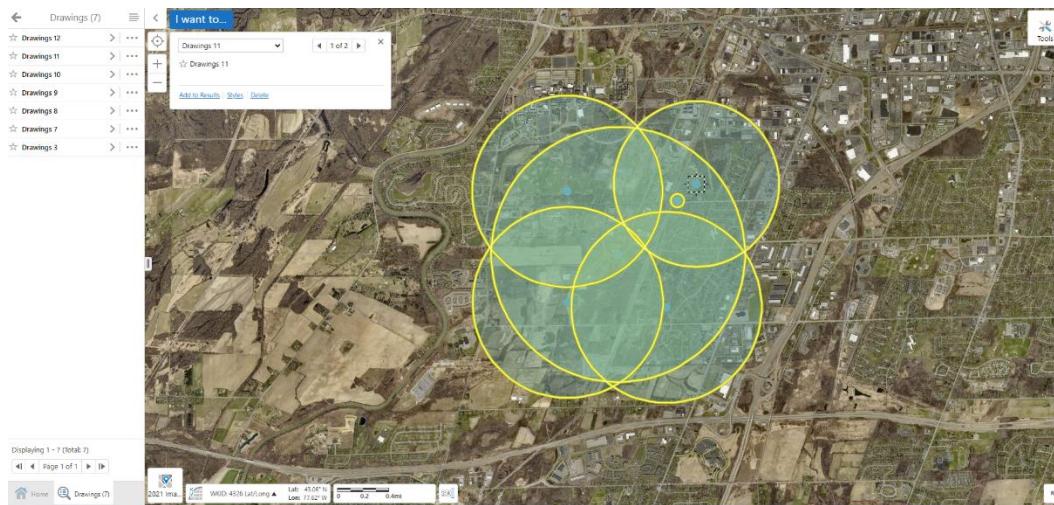

**Appendix Figure C-2: One Mile Radius Around 1025 John St, West Henrietta, NY**

To ensure all potential residential addresses were identified, four separate queries that encompassed the entire one-mile radius around the facility were conducted using the drawing tools available on the website. Under the "Tools" menu in the top right corner, the user can add a point to the map. Once a point is added, it can be selected to bring up a menu in the top left corner. From here, selecting the "Add to Results" option brings the "drawing" of the point into the left sidebar. By clicking on the three dots to the right of the drawing name, then "Show Buffer Options", a circle of a given radius can be drawn on the map around the point. This functionality was used to create four smaller radii from which to query a list of parcel addresses and verify that they encompassed the entire one-mile radius surrounding the facility.

<sup>1</sup> [Monroe County Interactive Parcel Map](https://maps.monroecounty.gov/Html5Viewer2/index.html?viewer=Parcel_Visitor): [https://maps.monroecounty.gov/Html5Viewer2/index.html?viewer=Parcel\\_Visitor](https://maps.monroecounty.gov/Html5Viewer2/index.html?viewer=Parcel_Visitor)

### Appendix Figure C-3: Four Search Radii

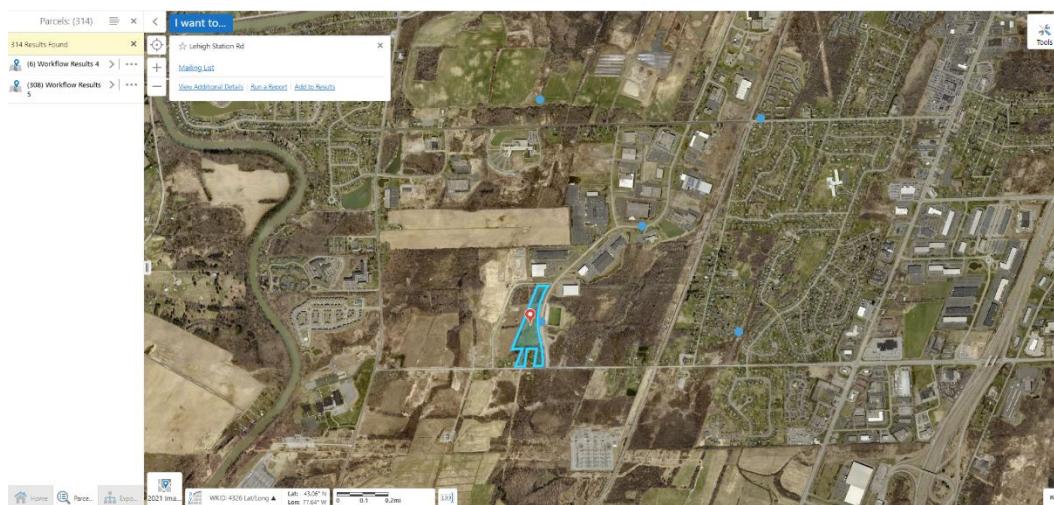

Four points were created manually such that adding smaller radii around them would allow for the entire one-mile radius around the facility to be accounted for without exceeding the maximum number of query results. The tax parcel in closest proximity to each point was selected and an address query was run for each. The four query radii that were used are indicated by the four smaller circles shown in Figure C-2 encompassing the larger circle which represents the one-mile search radius around the facility.

The four tax parcels chosen as closest to the four points were:

- ▶ Top right quadrant: 16 White Knight Ln, 0.65 mi radius used
- ▶ Top left quadrant: 232 Bailey Rd, 0.8 mi radius used
- ▶ Bottom right quadrant: 35 Cedarhurst Dr, 0.8 mi radius used
- ▶ Bottom left quadrant: Lehigh Station Rd (exact parcel shown in Figure C-3), 0.8 mi radius used

### Appendix Figure C-4: Location of Lehigh Station Rd Search Query

Duplicate addresses from the results of the four queries were removed to generate the list of parcel addresses within one mile of the facility. Any tax parcels without a street number were also removed. Note that the results of this method are conservative as they include addresses beyond a one-mile radius of the facility.

## D.2 Determination of Non-Residential Stakeholders

Non-residential stakeholders within a one-mile radius of the facility were identified according to the guidance within *Tips for Preparing a Public Participation Plan* provided by the NYSDEC<sup>1</sup>. Religious establishments, listed on the Town of Henrietta Congregations<sup>2</sup> webpage were located on Google Earth to determine if they were located within the one-mile search radius. The elected officials determined to be stakeholders that represent the area in local government were identified as: the County Executive<sup>3</sup>, County Clerk<sup>4</sup>, County Sheriff<sup>5</sup>, County Legislators representing the Town of Henrietta<sup>6</sup>, and Town of Henrietta Board members<sup>7</sup>. Community organizations listed on the Town of Henrietta Community Organizations<sup>8</sup> page were searched within Google Earth to determine if they were located within the one-mile search radius. Additional local businesses and recreational facilities not otherwise accounted for and located within the one-mile search radius were identified by Google Earth place names and considered. Secondary non-residential stakeholders include local news media outlets, which were determined using the Town of Henrietta News and Media<sup>9</sup> webpage, and the State Senator representing District 59<sup>10</sup>, which includes the Town of Henrietta.

## **E.2 Process For Compiling Public and Social Media Coverage**

The list of local media coverage of the Innovation Center was generated based on the review of articles posted by local news outlets on the Town of Henrietta News and Media webpage<sup>1</sup>. Each of the local news outlets listed reported on the announcement and/or grand opening of the Innovation Center. The press releases and articles published by Plug Power were found on Plug Power's Media/News webpage<sup>2</sup>. The State of New York also highlighted the opening of the Innovation Center and the support of various state elected officials in its media release which was obtained from the New York State News webpage<sup>3</sup>. Only local news from the Henrietta and Rochester areas, state issued media releases, and Plug Power press releases were reviewed as these outlets are likely to be focused on a project in West Henrietta and relevant to stakeholders in the Potential Stakeholder Area.

## **APPENDIX F. PROJECT FACT SHEET**

---

## DRAFT FACT SHEET AND MEETING NOTICE

### Header

Our mission is to build the green hydrogen economy – green hydrogen sustainability solutions that lower carbon footprints, increase productivity, and lower operating costs.

Bringing over **375 jobs** to the Rochester area!

### About Us

Plug is building an end-to-end green hydrogen ecosystem, from production, storage and delivery to energy generation, to help its customers meet their business goals and decarbonize the economy.

With plans to build and operate a green hydrogen highway across North America and Europe, Plug is building a state-of-the-art Innovation Center to produce electrolyzers and fuel cells, and multiple green hydrogen production plants that will yield 500 tons of liquid green hydrogen daily by 2025.

### Our services

[use icons/ecosystem graphic here]

- Design, develop and manufacture green products
- Electrolyzers for hydrogen production
- Hydrogen liquefaction/transportation/storage/dispensing equipment
- Hydrogen applications

### What is Green Hydrogen?

Green hydrogen is hydrogen generated by renewable power sources or via an electrolyzer through the process of electrolysis — splitting water into hydrogen and oxygen. It is the cleanest form of hydrogen production. Plug uses technology called PEM water electrolysis that can be paired with renewable and intermittent sources such as solar, wind, and hydro-electric power to produce green hydrogen at a low cost to customers.

### The Innovation Center

Plug has invested over \$125 million into the Innovation Center at 1025 John Street location in West Henrietta, N.Y. where it will design, test, and manufacture the core technology that goes into fuel cells and electrolyzers. In 2023, the West Henrietta location will be fully operational and will produce Membrane Electrode Assemblies that will be used for fuel cell and electrolyzer stack technology and be implemented in applications around the world. At full capacity, the location will make up to 65,000 stacks.

## FAQS

### **What waste is created? How will they be managed?**

Fuel Cells that utilize hydrogen produce only electricity, heat, and water. As such, these fuel cells are considered emission-free. Electrolyzers use green electricity to split water into its hydrogen and oxygen components – where the hydrogen is captured and used as fuel and the oxygen is the only byproduct. None of the manufacturing process produces wastes that require sewer or storm water permits. The cleaning of process equipment will produce a solution of isopropyl alcohol that will be shipped off-site for incineration.

### **When will the Innovation Center be fully operational?**

The Innovation Center is estimated to be at full production capacity by the end of 2023.

### **What permits and approvals are necessary?**

Plug has submitted an Air State Facility permit application to the New York State Department of Environmental Conservation (NYSDEC).

### **What impacts can I anticipate during construction of the Innovation Center? How will they be mitigated?**

Since the Innovation Center is being constructed at an existing industrial building, no significant environmental impacts are anticipated during the construction phase except slight increase in vehicle traffic to bring in workers and equipment due to minor construction on the existing property.

### **What impacts can I anticipate during operation of the Innovation Center? How will they be mitigated?**

No significant environmental impacts are anticipated during operation of the Innovation Center, which will meet federal, state, and local codes, regulations, and permits. As part of the air permit application process, Plug has reviewed all applicable requirements and demonstrated the factory will meet New York State requirements for health-based off-site air quality. Most factory operations will not emit any air pollutants. Emissions from the primary process operation will be controlled using a state of art thermal oxidizer to destroy air contaminants before being released to the air. Plug has submitted details for approval to NYSDEC.

## **BACK SIDE OF PDF**

Plug Power Inc. (Plug)

Project Location: Gigafactory located 1025 John Street location in West Henrietta, NY

### **Community Meetings**

**Location:** RIT Inn and Conference Center, 5257 West Henrietta Rd., Henrietta, NY 14467 on <DATE> at <TIME>

Location: RIT Inn and Conference Center, 5257 West Henrietta Rd., Henrietta, NY 14467 on <DATE> at <TIME>

This meeting is being held to ensure that all potential stakeholders within the vicinity of the facility are aware of the operation of the plant and to give them an opportunity to provide input into the environmental permitting process. During the meetings, Plug will provide an overview of the proposed operations at the Gigafactory, the environmental permitting requirements, and potential environmental impacts and controls proposed to mitigate those impacts.

Stakeholders in the vicinity should attend this meeting to become familiar with the Gigafactory and to ask questions of, and provide feedback to, Plug.

Plug is seeking feedback from the public on the potential environmental impacts from the facility's operation. Members of the public can provide feedback during the question-and-answer period of the public meeting listed above or by sending written comments to Trinity Consultants, 1580 Columbia Turnpike, Bldg. 1, Ste. 1, Castleton-on-Hudson, NY 12033.

*For questions regarding this meeting on behalf of Plug, contact Brian Noel, Manager of Consulting Services with Trinity Consultants, [bnoel@trinityconsultants.com](mailto:bnoel@trinityconsultants.com), 518-348-9276, or the Trinity Consultants street address listed above.*

## Mission Statement

Initial Working DRAFT

Plug's mission is to build the clean hydrogen economy – green hydrogen sustainability solutions that lower carbon footprints, increase productivity, and lower operating costs.

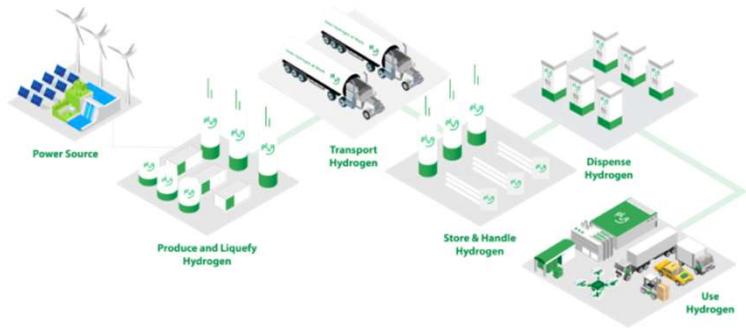

## Clean Hydrogen Fuel Cell Products

Plug's fuel cells are designed for today's and tomorrow's supply chain and logistics applications, on-road electric vehicles, stationary power markets, and more.

## About Plug

- Building an end-to-end green hydrogen ecosystem to meet customer's business goals and decarbonize the economy
- Created first commercially viable market for hydrogen fuel cell technology: deployed > 50,000 fuel cell systems and > 165 fueling stations

25 years of innovation	60,000+ systems in shipped
258 granted patents	888+ million hours of operation
40+ tons of hydrogen consumed daily	3,000+ employees

**Power Source:** Wind turbines and solar panels.

**Produce and Liquefy Hydrogen:** Hydrogen tanks and processing units.

**Transport Hydrogen:** Tank trucks and railcars.

**Store & Handle Hydrogen:** Large storage tanks and distribution infrastructure.

**Dispense Hydrogen:** Fueling stations.

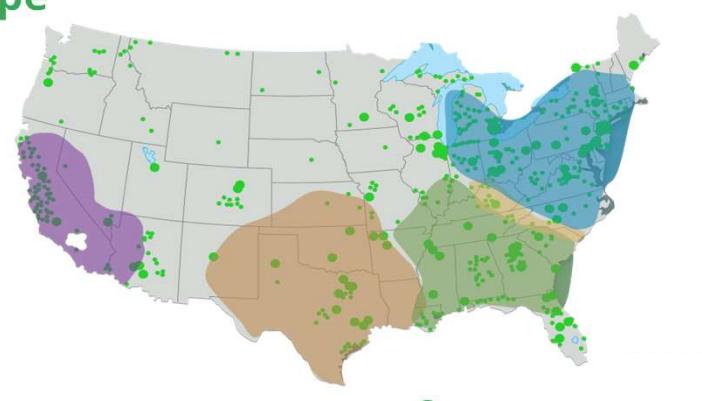

**Use Hydrogen:** Various industrial and transportation applications.

7

7

**Initial Working DRAFT**

## Build and operate green hydrogen highway across North America and Europe

The map shows the distribution of green hydrogen production facilities across the United States and Canada. Concentrations of facilities are visible in the West Coast, Midwest, and Eastern Seaboard regions. A legend indicates two types of customer locations:

- GenFuel Hydrogen Customer Locations (green dots)
- Stationary Power Customer Locations (blue dots)

**GenFuel Hydrogen Customer Locations:** Located primarily in the western US and along the eastern coast.

**Stationary Power Customer Locations:** Located in the central and eastern US, with significant concentrations in the Midwest and South.

**Public Meeting – XX-XX-2022**

8

## Electrolysis: Hydrogen from Water

Electricity splits the H<sub>2</sub>O molecule into its component parts: hydrogen & oxygen.

The oxygen is typically vented to the atmosphere while the “product” hydrogen is captured, compressed, piped, transported, etc. for its desired use.

Cost of electricity feedstock is a very significant contributor to the cost of the gas product:

13

## West Henrietta Innovation Center

Initial Working DRAFT

- Proud to lead the green hydrogen movement from its home state of New York
- \$125M investment in new Innovation Center
- Location: 1025 John Street location in West Henrietta, NY
- Facility to design, test, and manufacture the core technology that goes into fuel cells and electrolyzers

***Bringing over 375 jobs to the Rochester area!***

Public Meeting - XX-XX-2022

14

14

## West Henrietta Innovation Center

Initial Working DRAFT

- The Innovation Center will utilize green electricity to produce green hydrogen under a New York Power Authority (NYPA) program that utilizes Niagara Falls hydro power.
- Plug is a strong supporter of bringing high-tech, high-paying clean energy jobs to Rochester and continues to give back to the local community.

Public Meeting - XX-XX-2022

15

15

## Project FAQs

Initial Working DRAFT

### **When will the Innovation Center be full operational?**

- Full production capacity expected by end of 2023

### **What permits and approvals are necessary?**

- Air State Facility permit – application submitted to the New York State Department of Environmental Conservation (NYSDEC)

### **What impacts can I anticipate during construction of the Innovation Center ? How will they be mitigated?**

- The Innovation Center is being constructed at an existing industrial building
- No significant environmental impacts except slight increase in vehicle traffic to bring in workers and equipment and due to minor construction on the existing property.

Public Meeting - XX-XX-2022

16

## Project FAQs

Initial Working DRAFT

### **What impacts can I anticipate during operation of the Innovation Center ? How will they be mitigated?**

- No significant environmental impacts
- The Innovation Center will meet federal, state, and local codes, regulations, and permits.
- Most factory operations will not emit any air pollutants.
- Emissions from the primary process operation will be controlled using a state of art thermal oxidizer to destroy air contaminants before being released to the air.

### **What waste is created? How will they be managed?**

- Plug's fuel cells are emission free.
- None of the manufacturing process produces wastes that require sewer or storm water permits.
- The cleaning of process equipment will produce a solution of isopropyl alcohol that will be shipped off-site for incineration.

Public Meeting - XX-XX-2022

## Project FAQs

Initial Working DRAFT

### **How can I participate in the permitting process?**

- Through this meeting!
- Comments may be provided in writing between July XX – August XX, 2022 at  
Trinity Consultants  
1580 Columbia Turnpike  
Building 1, Suite 1  
Castleton-on-Hudson, New York 12033
- Comments may be provided directly to the New York State Department of Environmental Conservation after the air permit is published on their Environmental Notice Bulletin website (updated every Wednesday)
  - <https://www.dec.ny.gov/enb/enb.html>

## **APPENDIX H. CENSUS TRACT LANGUAGE ANALYSIS**

---

## APPENDIX H. CENSUS TRACT LANGUAGE ANALYSIS

---

### H.1 Non-English Language Spoken at Home

**Appendix Table H-1: Percent Non-English Spoken at Home by Census Tract**

Census Tract Identifier (as defined by Census.gov)	Census Block Group (as defined by DEC Info Locator)	Non-English Language Spoken at Home (%)
132.05	360550132051	23
131.03	360550131031	20
131.04	360550131043	26

### H.2 Determination of Percent Non-English Language Spoken at Home

To determine the percent of non-English speaking households within the Potential Stakeholder Area for the project, the census tracts associated with the Innovation Center address of 1025 John Street, West Henrietta, NY were obtained from the DEC Info Locator website<sup>1</sup>. Census tracts (Census Block Group) identified as Potential Environmental Justice Areas on the Public Involvement information layer and are located within the radius of one (1) mile from the facility were identified using Google Earth. The relevant census tract demographic data were obtained from the Census Reporter webpage<sup>2</sup> using the Census Tract Identifiers. For the percentage non-English language determination, the “English only” value reported under section “Persons with language other than English spoken at home”, was subtracted from 100.
