# Expanding Plug's GenKey Material Handling Offering to Fleets with Fewer than 100 Forklifts

**Plug is on a mission to make hydrogen adoption easy.**
Plug is proud to introduce a new offering for fleets with fewer than 100 forklifts. The company's 25-year history of powering large fleets has paved the way for new applications and solutions for the material handling industry that make hydrogen adoption easier than ever. This new offering means more businesses can seamlessly upgrade to hydrogen fuel cells, which also includes compact hydrogen storage and dispensing.

# A Modular Outdoor Hydrogen Storage Solution

This offering is specifically designed to meet the needs of material handling organizations which own or lease warehouses with space restrictions. The modular outdoor hydrogen storage solution includes:

- Hydrogen compression module
- Standard container for hydrogen gas storage tubes
- Easy access system for fast hydrogen refill

The advantages of this storage solution include:

- Modularity and scalability allow for quick deployment — this solution can be permitted, installed, and operational in as fast as eight weeks
- The unique design allows for module drop-in with minimal construction or facility impact ensuring a flawless upgrade to hydrogen
- Design leverages Plug's experience in material handling environments to ensure easy service and maintenance without interruption to warehouse operations

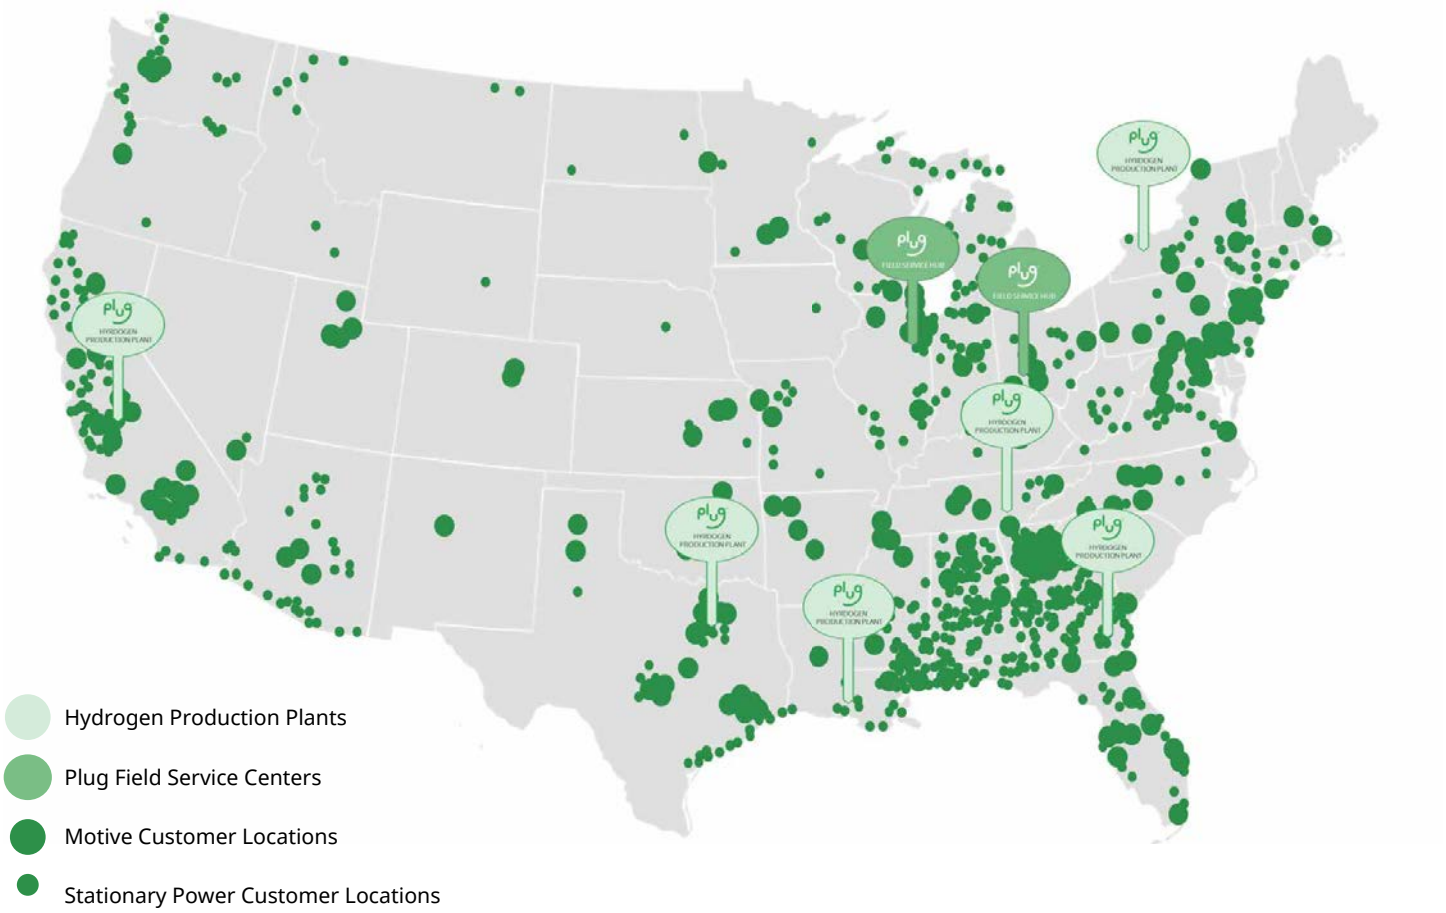

# Green Hydrogen from Plug-Owned Production Plants

By providing access to affordable green hydrogen from Plug's own production plants, Plug offers lower total cost of ownership and higher sustainability for customers.

The advantages of Plug's green hydrogen include:

- Unparalleled green hydrogen production capacity and around-the-clock access
- A one-stop shop for green hydrogen from an experienced team
- Electricity savings of 25% to 50% because you do not have to charge batteries

# Start Saving with Plug Today

Businesses currently using batteries will see savings of $260,000 to $1.2 million per year when upgrading to hydrogen and fuel cells. Let's start the conversation today on how Plug can help your warehouse!
